

# ARIZONA'S WORKFORCE

A press release from the Arizona Dept. Of Economic Security, Research Administration

March 4, 2004

## Arizona's Unemployment Rate Moved to 5.2 Percent in January as Economy Sheds Nearly 46,000 Nonfarm Jobs

**Note:** With this report Research Administration (RA) releases "benchmarked" revised Current Employment Statistics (CES) for 2002-03. Additionally, RA releases revised statewide Local Area Unemployment Statistics (LAUS) for 2000-03. Caution is, therefore, advised when referring to earlier published material, text and data.

Arizona's civilian labor force experienced a slight expansion in January, rather than the typical contraction that follows the holidays. Employment levels held more firmly than usual in January, resisting its otherwise downward seasonal trend, while unemployment levels rose above seasonal expectations. This increased the jobless rate to 5.2 percent, slightly upward from 5.0 percent in December.

As expected for January, Arizona's post-holiday economy experienced mostly seasonal related job losses. Figures for January show a loss of 45,900 nonfarm jobs from December's all-time record level of 2,348,900. However, despite these mostly seasonal losses, Arizona's nonfarm jobs showed considerable improvement from just one year earlier. January's figures (at 2,303,000) shows Arizona's economy added 50,000 nonfarm jobs since January 2003, and this represents an annual growth of 2.2 percent. While Arizona averaged 1.1 percent growth in 2003, the trend was primarily upward, with the fourth quarter showing the strongest gains of the year as December showed over-the-year growth of 1.5 percent.

In the last 12 months, Arizona's economy has shown an increased demand for labor with strong annual job growth rates in the following industries: Construction, 7.8 percent; retail trade, 3.7 percent; Professional and business services, 3.5 percent; educational and health services, 5.8 percent—with educational services, alone, showing expansion exceeding 13 percent.

In general, the survey of Arizona companies showed that service-producing industries (-42,100) accounted

### Arizona, U.S. Economic Indicators

#### Jobless Rate (Seasonally Adj.)

	Jan '04	Dec '03	Jan '03
United States	5.6%	5.7%	5.8%
Arizona	5.2%	5.0%	5.9%
Phoenix-Metro	<b>Seasonally adjusted rates are not yet available.</b>		
Tucson-Metro			

#### Arizona Nonfarm Payroll Employment (in Thousands)

	Jan '04	Dec '03	Jan '03
Overall	2,303.0	2,348.9	2,253.0
Over-Month Pct. Chg.	-2.0%	0.4%	-2.5%
Year to Year Pct. Chg.	2.2%	1.6%	1.1%

for 92 percent of January's total losses, while the goods-producing industries (-3,800) accounted for the remainder. Nearly two-thirds of the job losses occurred in private industries, with government jobs accounting for the balance. Of the eleven major industry groups, only one--education and health services--experienced a monthly gain. Natural resources remained unchanged.

Government declined by 15,600 jobs, primarily due to the holiday hiatus of state and local public education (14,900) staff. These jobs are expected to return as schools re-open following the holidays.

Trade (-12,900 jobs) represented 28 percent of total losses in January as a result of seasonal reductions. Wholesale trade reductions totaled 800 jobs while retail trade pared 12,100. Clothing and general merchandise stores cut 7,800 jobs. Although building materials and garden supply was unchanged, job losses were otherwise widespread among other sectors--food and beverage stores (-300), electronic and appliances (-300), motor and vehicle parts (-300), and furniture and home furnishings (-200).

Transportation and warehousing declines numbered 600 jobs in January. Air transportation was unchanged, while truck transportation lost 200. While

(continued on page 2)

each sector showed better-than-seasonal figures for January, each also had weak fourth quarter 2003 hiring.

Professional and business services (-6,400) accounted for 14 percent of the total monthly job losses. While management of companies was unchanged, professional and technical services lost 1,600 jobs after showing three consecutive monthly increases. Administrative and waste services (-4,800) losses were widespread as employment services pared 2,900 jobs, services to buildings cut 1,100, while business support jobs were reduced by 500.

After five consecutive months of increases, leisure and hospitality had a decrease of 3,400 jobs in January. These losses were prevalent across most sectors.

Education and health services showed a slight gain of 100 jobs in January. Private educational services gained 200. Meanwhile, healthcare and social assistance managed an increase of 100 jobs despite decreases in some sectors.

Information services pared 900 jobs. Job losses occurred in both publishing industries (-200) and telecommunications (-400) sectors. Since beginning the downturn from its mid-2000 peak of 55,600 jobs (or 2.5% of total jobs), the information services group has been struggling to turn-around.

The decrease of 2,000 jobs in financial activities was widespread across most industry sectors. A meager gain of 100 jobs in the securities, investments sector was the only exception. Otherwise, the rest of finance and insurance posted a loss of 1,100 jobs. Real estate, rental, and leasing jobs fell by 900.

Manufacturing (-1,000 jobs) showed extensive losses. This industry typically shows job declines in January, so any improvements will, most likely, occur in the coming months. Durable-goods industries had a reduction of 700 jobs and nondurable-goods shed 300.

Construction fulfilled expectations for January with a loss of 2,800 jobs that was below the ten year average. Notably, this industry hasn't experienced a monthly decline since January 2003. Building construction (-1,100 jobs) and special trades contractors (-1,800) showed reductions, while heavy and civil engineering gained 100.

In conclusion, Arizona's economy experienced mostly seasonally related job losses in January. Notably, most industry groups showed better-than-seasonal figures in January, in that there were fewer than expected losses or slightly better than expected gains. However, the exception to this was with information services, an industry group that continued to struggle. Consumer demand typically falls from the peak-demand levels of the holidays, so most retailers and service providers down-scale their workforce to satisfy lower levels. Since education (public and private) represents roughly 10 percent of Arizona's economy, its seasonal influence is rather great as schools open and close, or en-masse take various breaks. As expected, January figures were pushed downward as this workforce departed for a holiday break. As they return, Arizona's employment figures will be influenced upward.

Equal Opportunity Employer/Program

Under the Americans with Disabilities Act (ADA), the department must make a reasonable accommodation to allow a person with a disability to take part in a program, service, or activity. For example, this means that if necessary, the department must provide sign language interpreters for people who are deaf, a wheelchair-accessible location, or enlarged print materials. It also means that the department will take any other reasonable action that allows you to take part in and understand a program or activity, including making reasonable changes to an activity. If you believe that you will not be able to understand or take part in a program or activity because of your disability, please let us know of your disability needs in advance if at all possible. This document is available in alternative formats by contacting the Arizona Department of Economic Security, Research Administration, at (602) 542-3871.
